PROFESSIONAL SUMMARY

Entry-level Cloud and DevOps Engineer with hands-on experience deploying AWS infrastructure, building CI/CD pipelines, containerizing applications, and managing Kubernetes workloads in Linux environments. Experienced with AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Linux, Python, and Bash. Completed AWS Cloud Quest: Cloud Practitioner with practical experience in cloud infrastructure, automation, deployment, and troubleshooting.

EDUCATION

Bangalore Technological Institute

Bachelor of Engineering in Electronics & Communication Engineering, CGPA: 8.32

Nov. 2022 – May 2026

Bengaluru, Karnataka

TECHNICAL SKILLS

Languages & Scripting: Python, Bash, Shell Scripting, SQL

Cloud: AWS EC2, S3, IAM, VPC, Lambda, CloudFormation, CloudWatch, Auto Scaling, Application Load Balancer, EFS, Route 53, AWS CLI

DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, Terraform, CI/CD, Docker Hub

Infrastructure: Terraform, Infrastructure as Code (IaC), YAML, Linux Administration, Deployment Automation, Cron Jobs

Tools: Git, GitHub, AWS CLI, kubectl, Minikube, Kind, Postman, Docker Desktop, MySQL Workbench

Concepts: Infrastructure as Code, Containerization, Cloud Infrastructure, Kubernetes Orchestration, IAM, Networking, Monitoring, Automation, Troubleshooting

EXPERIENCE

MindMatrix

Android App Development Intern

Feb. 2026 – May 2026

Bengaluru, Karnataka

- Developed and shipped Android application features using Android Studio, contributing to a live edtech application used by students.
- Integrated REST APIs and Generative AI APIs into the mobile application and managed application data using Firebase Realtime Database.
- Deployed and maintained backend services using Google Cloud Platform and Vercel, gaining hands-on exposure to cloud-hosted production environments.
- Used Git and GitHub for version control, maintained structured branching workflows, and collaborated with the development team through agile sprint cycles.
- Configured environment variables and deployment settings across development and production builds.

PROJECTS

Highly Available Cloud Web Application | *Terraform, AWS EC2, VPC, ALB, Auto Scaling, CloudWatch*

- Provisioned and managed AWS infrastructure using Terraform, defining reusable Infrastructure as Code for VPC networking, EC2 instances, security groups, Application Load Balancer, and Auto Scaling resources.
- Deployed a highly available web application using multiple Amazon EC2 instances behind an Application Load Balancer.
- Configured VPC networking, subnets, security groups, and routing for secure communication between cloud resources.
- Implemented Auto Scaling to dynamically adjust EC2 capacity based on application demand.
- Configured CloudWatch monitoring to track infrastructure metrics and identify performance or availability issues.

Containerized Application CI/CD Pipeline | *Docker, Jenkins, GitHub Actions, Linux*

- Built a CI/CD pipeline using Jenkins and GitHub Actions to automate application builds and Docker image creation.
- Containerized applications using Docker and published images to Docker Hub for consistent deployment.
- Integrated GitHub repositories with automated workflows to trigger builds following code changes.
- Troubleshoot Docker permissions, dependencies, Git configuration, and deployment issues in Linux environments.

Kubernetes Application Deployment | *Kubernetes, Docker, YAML, Linux*

- Deployed a containerized REST API using Kubernetes Deployments, Services, Pods, ConfigMaps, and Secrets.
- Configured replicas and rolling updates to support application availability during deployments.
- Created Kubernetes YAML manifests for repeatable application deployment and configuration.
- Used kubectl to monitor workloads and troubleshoot deployment and connectivity issues.

CERTIFICATIONS & TRAINING

AWS Cloud Quest: Cloud Practitioner

DevOps on AWS – AWS Skill Builder

AWS Fundamentals – GUVI

DevOps – Intellipaat

AWS IAM – AWS Skill Builder

AWS Lambda – AWS Skill Builder

Amazon S3 – AWS Skill Builder

API Test Automation with Postman – TestAutomationU

Cybersecurity – CySecK Karnataka

SQL for Beginners – Simplilearn

LEADERSHIP

BTI Students' Club

Dec. 2024 – Aug. 2025

Vice Secretary

Bangalore Technological Institute

- Managed club operations for a 200+ member student body and coordinated technical seminars, workshops, and student activities.
- Led a team of 10+ volunteers across multiple events while coordinating communication and documentation with faculty administration.

Final Year Project

Jun. 2025 – Jan. 2026

Project Team Lead

Bangalore Technological Institute

- Led a 4-member project team through development, technical tasks, milestones, testing, documentation, and faculty reporting.

LANGUAGES

English, Hindi, Kannada, Tamil
